

AI 4 FUEL POVERTY

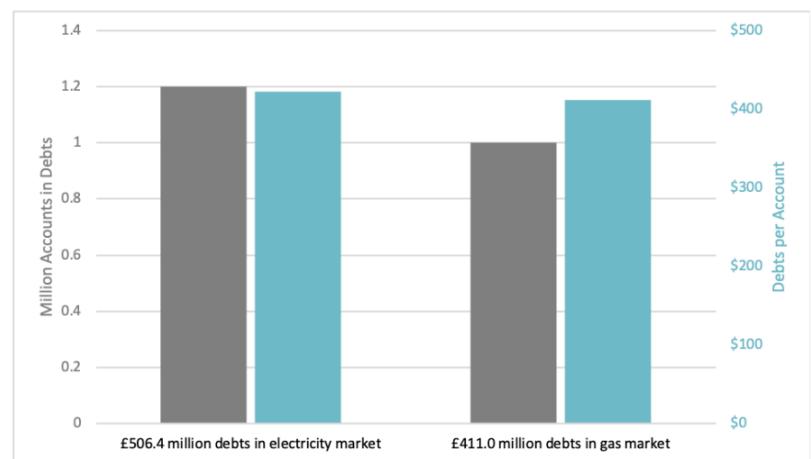

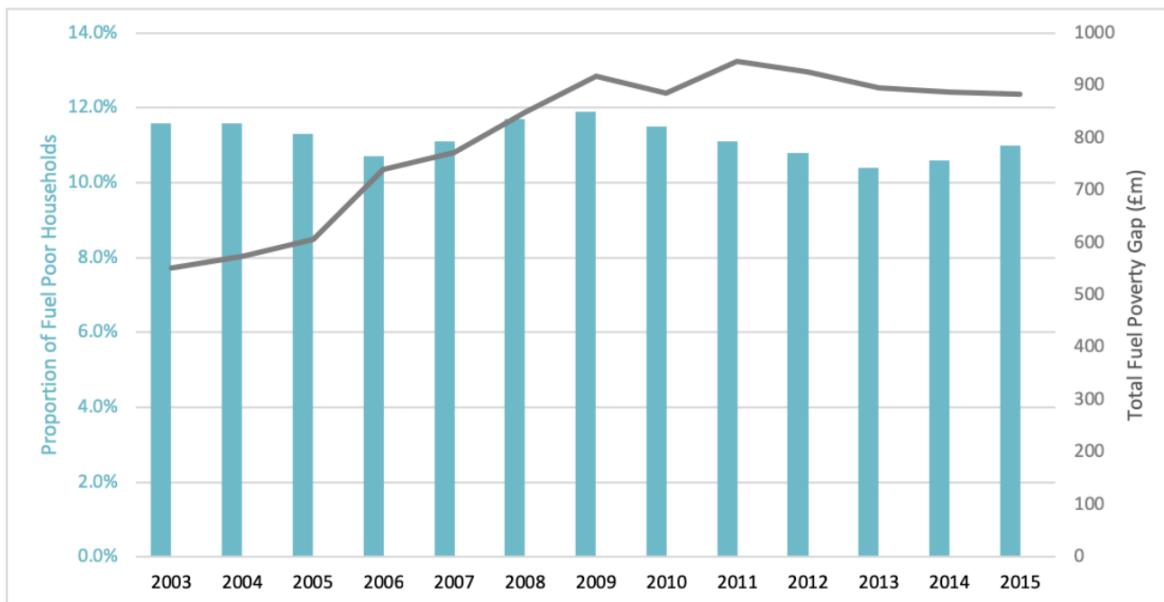

Product Description & Pricing

Manchester Technology Centre
Oxford Road
Manchester
M1 7ED

FACTS ABOUT FUEL POVERTY

The UK Government is under a legal obligation to cut fuel poverty and energy suppliers are mandated to identify fuel poor households for targeted assistance. Energy suppliers have regulated obligations (through the Energy Company Obligation or ECO) to tackle fuel poverty and from April 2017 have committed £640million annually to fulfil their obligation. To date suppliers have relied on referrals from statutory authorities and social welfare organisations, or, since April 2017, requesting already stretched local authorities to identify households for them.
